Part II. Vending Facilities and Vendors

The numbers of vending facilities and vendors are indicators of program growth and are reported by Federal, public, and private locations. Part II contains eight sections (A through H). For the purposes of this Section, a "vending facility" is the total operation assigned to a vendor whether it is on a single property or on multiple properties. It is understood that sometimes vending in multiple buildings will be combined in order to generate enough revenue to make the operation viable for a blind vendor. These are often referred to as "vending routes." Although a vending route may consist of multiple locations, for the purposes of this report, the SLA should report such a route as a single vending facility. Some routes may include vending in buildings governed by different property management. For example, a route may include vending in Federal buildings, other public properties, and private properties. In order to determine which category to report such a route, the SLA should consider from what type of property most of the sales are generated. If a route is "anchored" by a Federal location and most sales are generated from Federal properties, it should be considered a Federal vending facility. Conversely, if most of the sales are generated on State property, then the facility should be reported under "Public Property." This same principle would apply to any vending facility that encompasses more than one physical location even if it is not considered a vending route.

Definitions

- Federal Property A facility operated by a blind vendor under the Vending Facility Program on "any building, land, or real property owned, leased or occupied by any department, agency or instrumentality of the U.S...." (34 CFR Sect. 395.1).
- Public Property A facility operated by a blind vendor under the Vending Facility Program on State, municipal, or county property.
- Private Property A facility operated by a blind vendor under the Vending Facility Program on private property.

Part III. Vending Locations under the Interstate Highway Program

(Surface Transportation Assistance Act amended by the Intermodal Surface Transportation Efficiency Act of 1991 amended by the Transportation Equity Act for the 21st Century of June 9, 1998) The amendments do not

alter the content of Section 111 of the earlier legislation.

This part of the form is designed to collect specific data on vending machine locations placed in safety rest areas of the national system of interstate highways. SLAs designated under the Randolph-Sheppard Act shall be given priority by the State to operate such vending machine locations.

The data in this part will provide a summary of activities directly resulting from the above-cited legislation. The information is important to determine the impact of that legislation on the Randolph-Sheppard program in terms of employment and revenue.

Part IV. Program Expenditures by Source of Funds

This part is designed to collect, for accountability purposes, comprehensive information on all program expenditure categories by source of funds during the Federal fiscal year. The Vending Facility Program generally has four different sources of funding expenditure categories. They are: the Federal and/or non-Federal vending machine income that is not assigned to the vendors, set-aside funds from the net proceeds of the vending facilities (levied set-aside), State appropriated funds, and Federal funds allotted to the State for vocational rehabilitation services under section 110 of the Rehabilitation Act of 1973, as amended. In rare instances, SLAs may have "other" sources of non-Federal funding unique to their program. Please use Column (6) to reflect these funds on the appropriate lines. Please note that the source of such funds may have statutory or other restrictions related to their use. Federal law and regulations set forth the purposes for which funds from the different sources may be used. In Columns (1) through (6), enter the dollar amount by funding source(s) for each of the expenditure categories listed below in rows 1 through 11 and enter the total dollar amount for each expenditure category in Column (7). Also, remember that "pass through" funds are not characterized as program expenditures and should not be reflected in this section. Finally, expenditures reported on any line below should not be included in the total reported for another line, thereby eliminating the duplication of reported expenditure amounts.

Part V. Distribution and Expenditure of Program Funds from Vending Manchine Income and Levied Set-Aside

This part is designed to collect, for accountability purposes, information on the distribution and expenditure of program funds from vending machine income and levied set-aside fees. Vending machine income is separated into two columns showing Federal and non-Federal funds.

Vending machine income is revenue accruing to the SLA from vending machines located on Federal property (Federal regulations) and non-Federal property (State regulations). The non-Federal category would include vending machine income from interstate highway rest stops authorized by the Surface Transportation Assistance Act amended by the Intermodal Surface Transportation Efficiency Act of 1991 amended by the Transportation Equity Act for the 21st Century of June 9, 1998. Levied set-aside fees are funds that accrue to the SLA from an assessment against the net proceeds of each Federal and non-Federal location under the program.
